IT

Fibre broadband update still set at December 2018 for activation at the Avonbridge exchange. A local resident spoke to the contractors doing cabling recently and it was indicated that the project was still likely to be completed by December.

A fibre to premises connection was made recently in a rural area of Blackburn. It appears that if fibre on poles has been installed near your property you have to get FTTP. If you are connected via a green roadside cabinet you can only get FTTC or pay a high installation cost to get a fibre line installed.
